

# Global Diagnostic Engineer

## Development Engineering & Enterprise Ltd

Established in 2005, Development Engineering & Enterprise Ltd (DEE-Ltd) provides innovative engineering solutions to a broad spectrum of customers and market sectors.

Due to the growth of the company we are looking to expand our engineering team and are actively seeking dedicated individuals to support a range of customer focused development projects.

## Role Type

Contract – Outside IR35

## Global Diagnostic Engineer

This is an excellent opportunity to work for a professional engineering company that offers a great working environment to deliver excellent customer service. To apply for this role you will be hard-working, passionate and reliable. In return the job offers a great basic salary and earning potential.

Responsibilities will include:

- Proactively, using acquired knowledge and experience as well as relevant tools and methods, develop diagnostic procedures for fixing vehicle and software issues.
- Validate and identify process improvements on current published procedures for diagnostic or software issues
- Lead work progress and development of procedures, standards and requirements for service
- Provide a level of strategic support and advise in complex customer cases using diagnostic specialised skills to interpret data
- Liaise with engineers to create technical fixes for vehicle concerns by being the single point of contact for support issues within the Technical Service function
- Assist the development and provide feedback on Part II specifications and FTAs (i.e. Attendance of PE workshops, supplier reviews, sign-offs events).
- Travel between customer sites and suppliers within the UK and Europe if required
- Work experience in automotive integration testing at System/Architecture Level
- Excellent knowledge of automotive CAN protocols Monitor traces (from the diagnostic machine) and Session files
- Work experience in Vector CANalyzer and Vector CANoe
- Good knowledge of diagnostic protocol UDS ISO-14229
- Good debugging/troubleshooting and electronic skills

Candidates will be HND or degree qualified with a minimum of 3 years' experience in an automotive development field. This position requires a dynamic individual with excellent interpersonal and communication skills who is self-motivated and able to work as part of an

integrated team. They will be passionate, enthusiastic, confident and personable with the ability to deliver to high standard under critical time restraints..

### **Remuneration**

Successful candidates will receive a highly competitive rate and benefits that will include the following:

- Contracting Role – Ltd or Umbrella (Overtime potential).
- 40 Hours working week.
- Potential of working from home as well as from office.
- Opportunity of contract conversion to permanent employment by OEM.

### **Essentials**

- Minimum 3 years automotive engineering experience.
- HND or Engineering degree qualified.
- Strong engineering/vehicle diagnostic problem-solving skills
- Enthusiastic, confident and personable
- Excellent numeracy skills
- High level of attention to detail
- Team player with the ability to work with people at all levels
- Excellent MS Office skills including Project, Excel, Word, PowerPoint and Outlook
- Able to work independently or as part of an integrated team
- Full driving license

### **Desirables**

- Previous diagnostic engineering / validation knowledge.
- Previous experience of similar role within OEMs globally.

If you want to be part of a genuinely friendly and professional team, with a passion to deliver excellent customer service then we would welcome the chance to discuss this opportunity with you.

### **Applications**
